Comment:

I am opposed to the construction of the 95 mile double-circuit transmission line as it is proposed at present. This line from San Luis Valley Substation near Alamosa to a new Calumet substation near Walsenberg, would have serious affects on the natural environment and terrain profile that exists now. While I realize power transmission lines are necessary, they absolutely must be constructed to have minimal encroachment on private property and skyline violation. Thank you.

PS: I own property and a home in Huerfano County along Co. Rd. 442, know as "Middle Creek".

I-259-001: Environmental Consequences (In Review)

Your email/letter/comment form has been received and your comment noted. Potential environmental consequences and mitigation measures from the proposed project will be addressed in the Environmental Impact Statement.

The Environmental Impact Statement is anticipated to be completed in late 2010 and will be available at

<http://www.usda.gov/rus/water/ees/ea.htm>.
